## Mental Health Care System

1. Atharva Jagtap
2. Sai Gite
3. Yash Kulkarni
4. Vaishnavi Jadhav
5. Dnyaneshwari aher

# Problem Statement

**Many individuals facing mental health challenges encounter significant barriers, including stigma, limited access to resources, and inadequate support networks. This often results in prolonged suffering, decreased quality of life, and reluctance to seek help. Addressing these issues is essential for improving mental health outcomes and promoting overall well-being.**

# **Relevance of the problem statement for social cause**

## **Relevance and Impact:**

- 1. Growing Need: More people need mental health help than ever.**
- 2. Access Problems: Hard-to-find resources can delay or prevent care.**
- 3. Privacy: Protecting user privacy encourages people to seek help.**
- 4. Care Gaps: Better coordination leads to more consistent and effective treatment.**
- 5. Engagement: A user-friendly app keeps people motivated to take care of their mental health**

# What is Mind Mapping

**Mind mapping is a visual thinking tool used to organize information, ideas, or concepts.**

## Activity: Persona

# 5W1H Activity

- Who
- What
- Where
- When
- Why
- How

## 5W-1H Activity

### Team 10:

Aspect	Questions	Answer
Who	Who is affected by the problem?	People with Mental Health issues ( like depression, trauma, anxiety, etc)
What	What exactly is the issue?	Nowadays, people and students of our age group face Mental health problems like depression, anxiety, trauma, etc.
Where	Where does the problem occur?	It can be faced anywhere across the world. Depends on the person's life situation/condition.
When	When does this problem arrives?	It depends person to person depending on their life. It can be due to several things like Work-life stress, financial Issues, personal problems, etc.
Why	Why is solving this project important?	Solving this project is important as almost every person nowadays face mental issues like depression, anxiety, etc. If the problem is not solved earlier can face serious consequences.
How	How will your solution address the problem?	Our main goal is to create an app for mentally ill people. In the app we will be having professional mental health advisors which will address their problem and keep regular track. We will be recommending entertainment sessions which will help them to come out of depression, etc. Will give them exercises like meditation, yoga, etc

# Theory of Prioritization

The "Theory of Prioritization" model explains:

- Ranking and sequencing actions, tasks, or resources.
- Purpose: Decision-making on what to prioritize or address first.
- Useful when resources are limited, ensuring critical tasks are completed first.

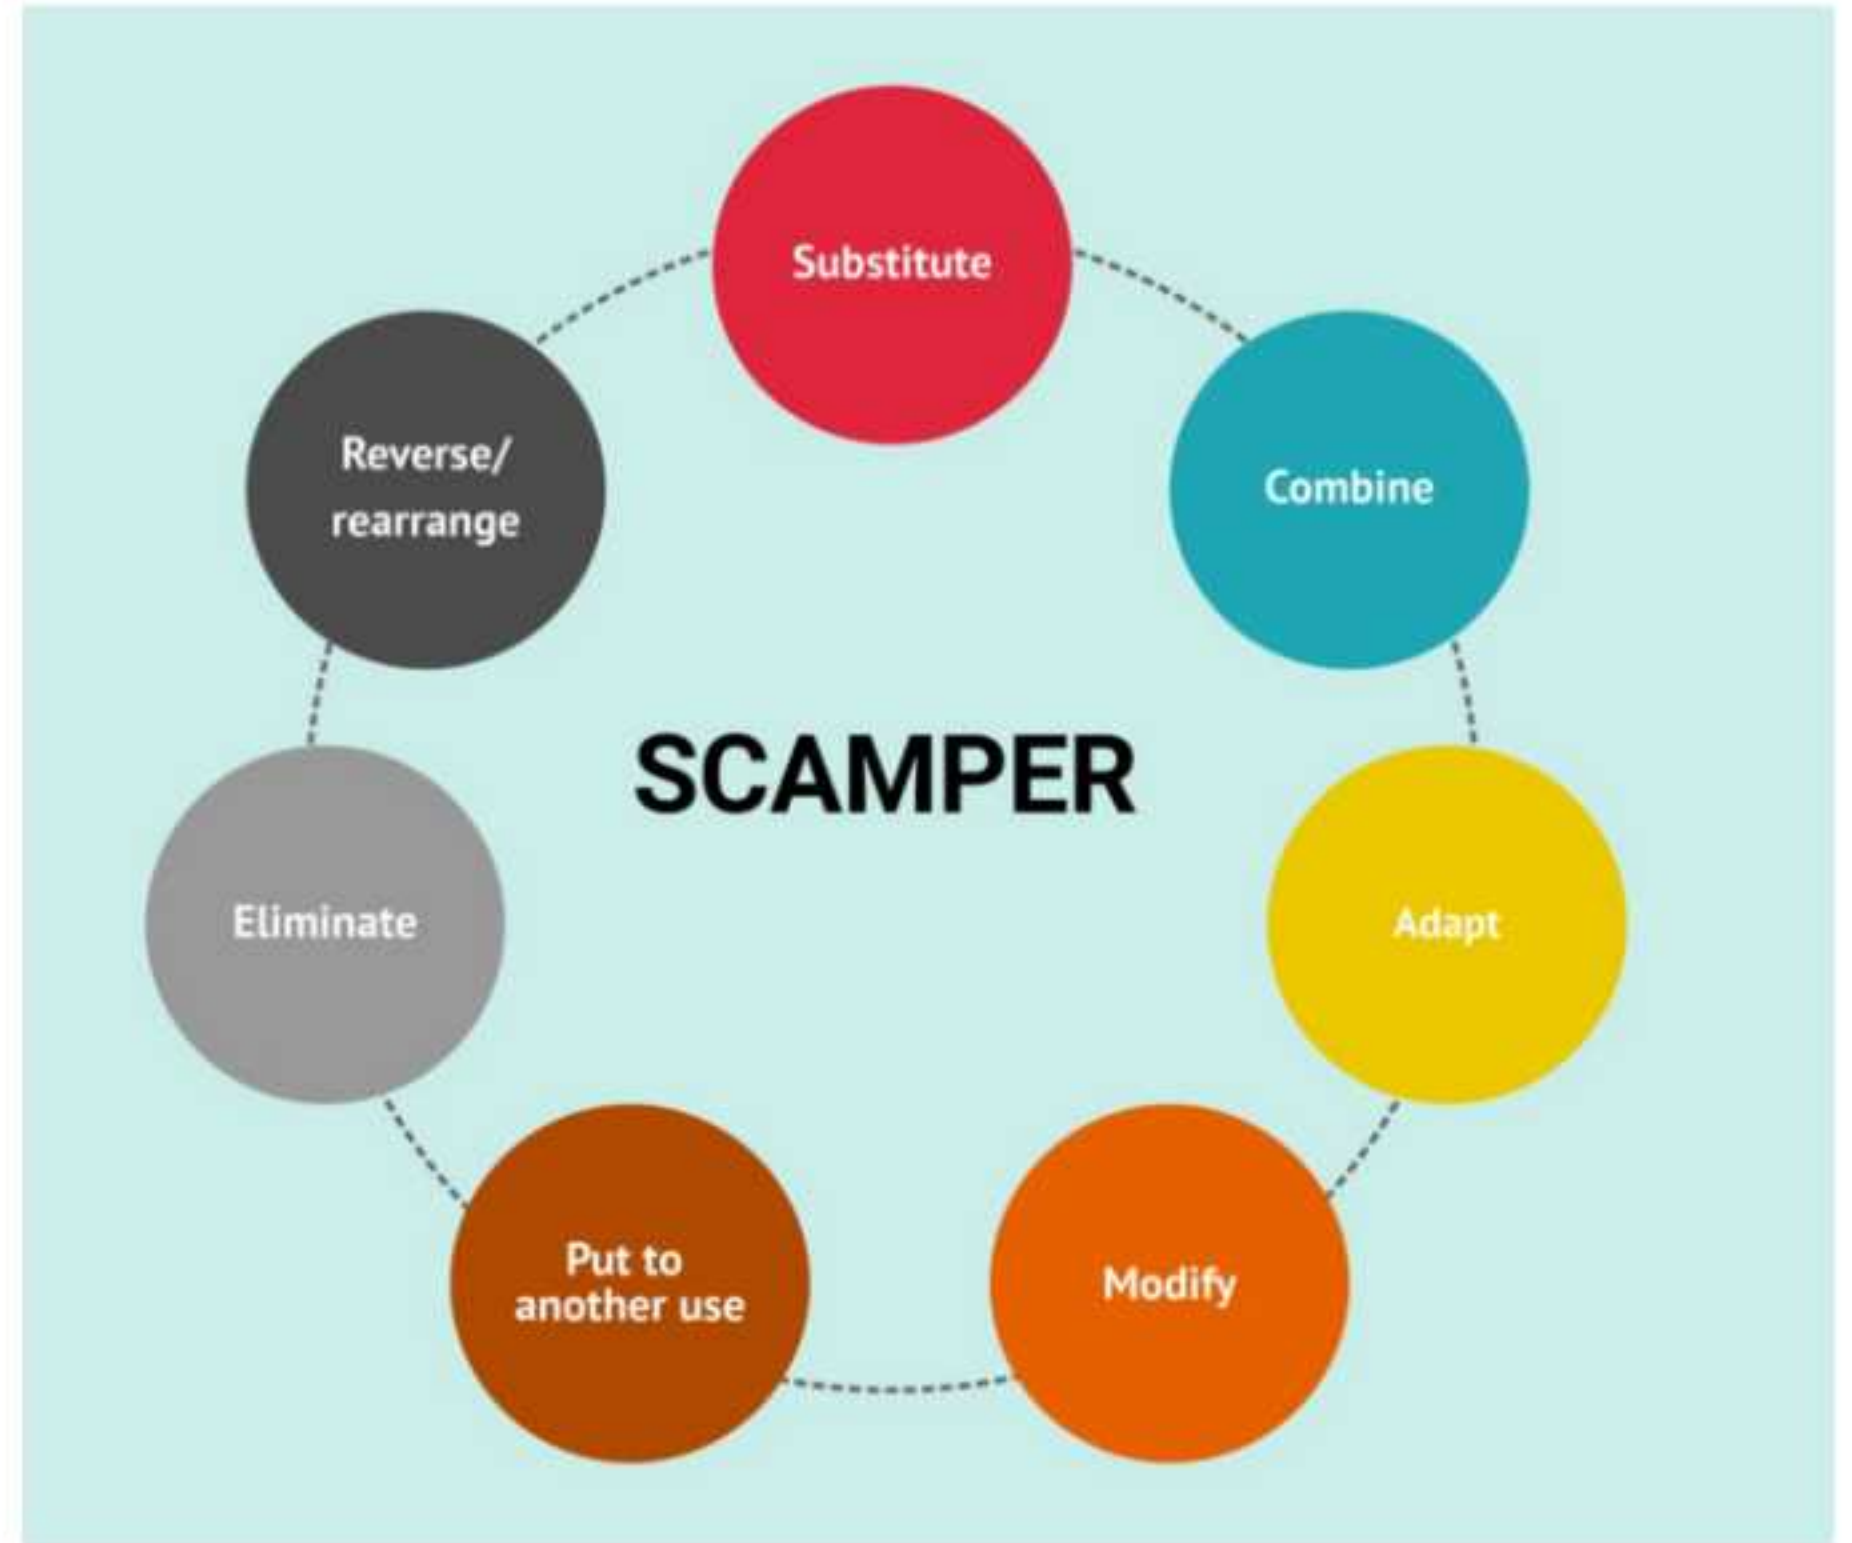

# Theory of Prioritization

Sr.NO	Identified Problem	Point (out of 6000)
1	Stress, Deperation, Anxite	6000
2	Lack Of Public Awarness	3300
3	Mood Disorders	2400
4	Limited Accessibility	1200
5	Technology Limitation	1000
6	Social Media Impact	3000
7	Facility not availible in rural area	3800

# Scamper

- It is a creative thinking and problem-solving technique.
- It Helps generate new ideas or improve existing ones.
- Systematically modify aspects of a product, process, or service.

# Scamper (Substitute, Adapt, Eliminate)

## 1. Substitute

- Substituting elements of existing systems with more effective or user-friendly options can directly improve user experience.
- For example, substituting in-person therapy sessions with virtual ones can increase accessibility.

## 2. Adapt

- Adapt successful models from other countries.
- Mental health system like community-based approach.

## 3. Eliminate

- Eliminate stigma through public awareness campaigns and education.
